FocusOn: Sturtevant Offers Complete Line of Material Processing Equipment for Ceramics

Whether it’s air classification or particle size reduction, Sturtevant’s air classifiers, crushers and mills can effectively process your ceramic materials. The Sturtevant Air Classifier will separate a product from a feed stream and also for dedusting. Sturtevant Crushers will reduce friable materials to granules where fines are undesirable, reduce particle size for fine grinding to coarse crushing capabilities. Jet mills, air classifying impact mills and pin mills are used for impact and agitation to grind and classify those materials. Learn about the complete line of ceramic material processing equipment here.

Compliance with REACH regulation requires companies to have up-to-date information on chemical substances. Click here to read the full article!

Join the Conversation
The Ceramic Industry magazine group on LinkedIn offers a forum for anyone involved in the ceramic, glass and related industries. In addition to networking and information sharing, the group offers many opportunities for discussion. We'd love for you to join the conversation!

Survey Says!
According to a report in the Financial Times, Volkswagen AG recently announced that employees (excluding senior management) will be blocked from receiving work emails on company BlackBerrys after work hours, reportedly to prevent employee burnout. In the last week’s CyberPoll, we asked readers if they would support this initiative at their company. Responses were fairly evenly split, with 45.5% supporting the initiative, 50% against and 4.5% uncertain. This question generated many reader comments. To view them, or to share your own thoughts on this topic, please follow this link.
